St. Lucie Celebrates Three New Site Successes

In the last few days, the St. Lucie team has achieved a few successes worthy of celebration.

For the first time in our site's history, Unit 1 has achieved all points on the INPO Index. This achievement was the result of integrated cross-functional efforts by our entire team. We never could have reached this achievement if every member of the team wasn't pulling in the same direction and focused on equipment reliability, strong operational focus and leadership excellence.

The Unit 2 rad monitor computer system was a complete upgrade of the PC-11 computer system that removed an antiquated 386 computer system. This system was redesigned from scratch without any outside help. The system has performed excellent since installation and there is positive acceptance from Operations. This was a great job by the project team, Engineering and I&C Maintenance and demonstrates a strong bias for action.

In addition, the Unit 1 Fuel Handling Building rad monitor and Unit 1 plant vent rad monitor project replaced obsolete rad monitors with state of the art equipment supported by a leader in the radiation monitoring industry.

These are three more site successes that demonstrate how far the St. Lucie team has come in resolving repeat issues, and how we can achieve anything when we focus on teamwork and PSL.

Excellence Message

Challenge and motivate each other to exhibit safety culture behaviors.

Safety

Flammable Liquids

When transferring flammable or combustible liquids from the original shipping container, transfer only to a properly labeled safety can (in quantities greater than 1 gallon). Small quantities may be placed in properly marked application containers for immediate use. The motors of all equipment being fueled shall be shut off during the fueling operation (unless specified by manufacturer's instructions).

Human Performance

Stop When Unsure is a behavior that is expected to be demonstrated at all times. Ask you department, work group or crew to give specific examples of when they have stopped when unsure.

PSL Pride Day!

All St. Lucie personnel are invited to help clean up our site on Friday, July 24. Bring your PPE and meet in front of the cafeteria at 7:30 a.m. At noon, participants can enjoy free hamburgers and hot dogs!

If you have any questions please contact **Bill Mangan** at ext. 7835.

Security Drill Today

Today, Security will be conducting an annual Force-on-Force exercise with a mock adversary force using MILES equipment. Drill activities are scheduled from 10 a.m. to 8 p.m.

If at any time you find yourself in the middle of a security drill, leave the area immediately. DO NOT interact with the drill participants. Follow any instructions given by Security or exercise controllers.

If you have any questions or concerns please contact Security at ext. 7005.

It's Not Too Late to Volunteer!

We still need volunteers to help package food today in the CBT lab located in the B-11 Building. Employees are welcome to serve more than one shift with supervisory approval. Help us meet our goal of sending 30,000 meals to families in need!
